New Enhancements Coming to the Fast Play Portfolio

Fast Play Is Moving Front and Center on GT20 & GT28 Machines – Available 12/10

To help drive awareness and sales of Fast Play games, the Fast Play tile on GT20 and GT28 vending machines is moving from the Draw Games section to the Scratch-off area.

Positioning Fast Play alongside other instant win products makes it easier for players to discover and access these games where they naturally expect to find instant win entertainment. This enhanced placement increases visibility, improves the player experience, and creates additional opportunities for impulse purchases and retailer commissions.

The updated Fast Play tile will clearly distinguish Fast Play as its own category of instant print on demand games and will feature a more interactive experience for players.

Enhanced Fast Play Tile Features

- Displays the current Fast Play progressive jackpot amount.
- Highlights a selection of available Fast Play games with colorful game tiles.
- Allows players to select a featured game tile and go directly to Quick Pick options for that game.
- Provides one touch access to the full Fast Play portfolio by selecting the Fast Play logo, progressive jackpot amount, or the “All Fast Play Games” button.

This update is designed to make Fast Play games easier to find, easier to play, and more effective at driving sales at retail.

Quick Reference Guide

Terminal "Display to Player" Enhancement – Available 12/10

The Retailer ProS2 terminal now includes a new **Display to Player** button that makes it easier to showcase Fast Play games to customers. With a single tap, the Counter Monitor pauses its advertising content and displays a clear menu of all available Fast Play games, helping retailers quickly highlight new games, identify which games contribute to the progressive jackpot, and show customers what is available to purchase.

This feature simplifies customer interactions, supports faster transactions, and creates additional opportunities to increase Fast Play sales at the counter.

The slide will appear on the Counter Monitor until the following exit conditions are met:

- Home button selected
- Back button selected
- 30 seconds of inactivity
- Non-Fast Play game button selected
