VERSION 1.1 - EFFECTIVE DATE: AUGUST 09, 2024

By purchasing any iLottery Instant Play Ticket and accessing any Instant Play Game, a player accepts and agrees to comply with these Game Rules and Regulations, the General Rules governing iLottery Instant Play games (hereinafter “Instant Play General Rules”), the iLottery Terms of Use, and all rules, terms and conditions, privacy policies, disclaimers and agreements on the Lottery Website at <http://www.kylottery.com> (collectively “the Rules”).

If you do not agree, do not access or purchase any Game.

1. INSTANT PLAY TICKET PRICE

An Instant Play Ticket for this Instant Play Game may be purchased **\$0.10, \$0.20, \$0.50, \$1.00, \$2.00, \$5.00, \$10.00, \$20.00, and \$30.00** unless authorized by the President at a discount for promotional purposes.

2. HOW TO PLAY

Win up to \$150,000!

To begin play, the player must select their price point before purchasing the game, and then the player must complete the purchase process set out in the iLottery Terms of Use. The outcome of the player’s ticket is determined at the time of the ticket purchase.

At the start of the game, Zombieville Cash Dash displays twenty (20) blocks in a 5x4 grid, a Prize Chart button, a Multiplier counter, and a BUY button.

By selecting BUY, the symbols will fall into place on the grid. When three (3) or more identical symbols create a cluster which are connected in the grid by sharing a side (a “winning cluster”), a corresponding prize in the paytable is won. A winning cluster of symbols is removed from the grid and additional symbols cascade down to fill the grid. All winning clusters in the grid are removed before new symbols cascade down. These symbols can create new winning clusters, which award corresponding prizes, and are removed from the grid. Symbols cannot be connected diagonally to form a cluster.

If the additional blocks added lead to a new winning cluster, the game continues until no winning clusters are present.

Find a winning pattern when a Multiplier symbol is on the board to increase the multiplier amount

for that round. Each winning pattern revealed while a Multiplier symbol is on the board increases the multiplier by one (1).

Reveal three (3) Bonus Symbols anywhere on the grid to activate the Bonus Game.

Scatter Brain Symbol

Reveal a Scatter Brain symbol anywhere on the grid for a chance to create new winning clusters. In order to activate this feature, all game symbols must have dropped onto the grid and no new winning clusters can be present. If the Scatter Brain symbol is revealed, but there are still new winning clusters present and additional symbols to cascade down, all the winning combinations will first play out, and then the Scatter Brain Symbol feature will activate.

Once activated, the Scatter Brain symbol will illuminate and expand, remove all the remaining symbols on the grid, and then, repopulate the grid with new game symbols in a new configuration.

If the new configuration leads to a new winning cluster, the game continues until no winning clusters are present.

Multiplier

If the Multiplier symbol is revealed on the grid at the same time a winning pattern is revealed, then the Multiplier is activated. Each time a winning pattern is revealed, the Multiplier counter increases by one (+1). When there are no more winning patterns on the grid, the total Multiplier amount is applied to the prize amounts won in that round.

Multipliers are not applied to any wins within Bonus Game.

Bonus Game

Reveal three (3) Bonus Symbols to trigger the Bonus Game. At the start of the Bonus Game, the game displays a 3x3 grid, a “Drops” counter set to five (5), and a prize meter.

At the start of the Bonus Game, a brain symbol pops out of the pipe at the bottom of the screen and activates the first round of “Drops”. Once activated, symbols fall onto the 3x3 grid. Only two (2) symbols can appear in the grid spaces during the Bonus Game. The grid will either reveal a Run symbol (Winning Symbol) or Dead End symbol (Non-Winning Symbol).

Any Run symbols that are revealed transform into zombie hands and are removed from the grid. Each time a Run symbol is removed, one (1+) spot on the prize meter is filled. If multiple Run symbols are revealed, multiple spots on the prize meter are filled. The prize meter fills up beginning with the bottom left arrow and moves towards the right (counterclockwise) and upwards to match corresponding prize amounts.

Revealing a “Dead End” Symbol does not result in removal of blocks and does not increase the prize meter.

When a Run symbol is removed from the grid, a new symbol falls from above to fill its place. When the grid is full of Dead End symbols, that round of "Drops" ends and the next "Drop" begins.

The game ends after the fifth (5th) round of "Drops" plays to completion.

Once the Bonus Game has ended, the player is awarded the single green highlighted prize shown on the prize meter. A player may only win the green highlighted prize. Prize amounts that are highlighted yellow during the bonus game, will not be awarded.

3. PRIZE STRUCTURES AND ODDS

Duplicate prize amounts indicate multiple ways to win the same prize amount; different odds may apply to each way to win.
